# Crash Course

A **VR** Simulation

Texting and Driving

In 2017 alone, 3,166 people were killed in motor vehicle crashes involving distracted drivers.

Crash Course

creates an environment that is both interactive and impactful to illustrate just how quickly a car accident may occur. When a player grabs the phone, they activate the car crash scene.

With the design of intuitive UI and strong images within the VR space, the hope is that the players experience and learn in a powerful and memorable way about the danger of texting and driving.

Space Bar

Press to grab the phone,
and press again to release the phone.
